

**ERA HYDRO BIOTECH  
ENERGY PRIVATE LIMITED**

Group Company- HYDRO BIOTECH SYSTEMS

 **Job Opening:** Project Engineer

 **Location:** Baner, Pune, Maharashtra

 **Company:** ERA Hydro-Biotech Energy Pvt. Ltd.

### What You'll Do:

- Understand project tenders and client requirements to accurately define project scope and deliverables.
- Prepare project budgets, detailed project plans, and coordinate project activities to meet agreed deadlines.
- Enter project requisites into the ERP system to generate required project reports and monitor progress.
- Attend client and internal project meetings and conduct visits to project sites and vendor locations for coordination.
- Ensure timely project invoicing based on project progress and follow up with clients for payment collection.
- Prepare and review technical submittals and project documentation as required by project specifications.
- Coordinate with the procurement team for vendor selection, finalization, and ensuring timely delivery of project materials.
- Plan and implement project execution, ensuring adherence to scope, schedule, and quality standards.
- Monitor daily project progress, identify issues and risks, and drive effective resolution.
- Implement and manage change requests whenever required to meet project outputs.
- Ensure professional work ethics and maintain confidentiality, upholding the organization's image to the highest standard.

### What You Need (Must-Haves):

- Strong knowledge of project planning, costing, and scheduling.
- Knowledge of project infrastructure, architecture, and related engineering disciplines.
- Minimum 5+ years of experience in wastewater project management.
- Proven experience managing projects through the entire project life cycle—from initiation to closure.
- Demonstrated experience in completing projects within scope, budget, and timeline.

### Skills & Behaviours

- Strategic planning skills to guide long-term project success.
- Financial planning and budgeting skills to manage project costs effectively.
- Strong leadership skills to coordinate and guide multidisciplinary project teams.
- Excellent communication, problem-solving, and stakeholder-management abilities.
- Ability to work under pressure and manage multiple priorities simultaneously.
